🪪 Profile

Senior Android Developer with **7+ years** of experience specializing in Android application development using **Kotlin, Jetpack Compose, Firebase, REST APIs**, and **React Native**. Successfully delivered **24+ mobile applications**, including high-traffic products achieving **50K+ installations**, across domains such as taxi booking, AI, augmented reality, social media, gaming, and POS systems. Expertise in **end-to-end app development**, performance optimization, and **cross-platform solutions**. Proven ability to **lead teams**, mentor developers, and deliver scalable, user-centric applications that align with business goals and enhance customer experience.

💼 Professional Experience

06/2025 – Present Amerali	**Sr. Android Developer,** *Zarstack* 🔗 Working as an Android Developer , building an EMI Solution product**.**
09/2024 – 05/2025 AHMEDABAD	**Sr.Android Developer,** *SilverSky Technology* 🔗 As a Senior Android Developer, React Native Developer, I develop new applications, manage and maintain existing ones, and mentor junior developers on best coding practices and bug fixing.
01/2023 – 09/2024 AHMEDABAD	**Sr.Android Developer,** *BRND TECH* 🔗 My role at this company involves managing POS applications that are built on MVP Structure and Dagger, as well as integrating various hardware.
06/2020 – 11/2022 RAJKOT	**Sr. Android Developer,** *TIS (Tech Integrity Service)* We have created apps related to the transportation business (taxi transportation and bus transportation). Implement and explore new things like MQTT, Endless services, Payment Gateways, Target, and Flavour (build variants) and gain around 1 year of experience as an iOS app developer.

On this journey, I lead my Android team.

08/2018 – 05/2020	**Android Developer,** *BMAC* 🔗
RAJKOT	I started my career at BMAC. It was a great learning experience. I have 1 year and 7 months (including training period) experience.
	Developed and designed more than 6 Apps and also worked with new methodologies and languages like Kotlin, AR-based Applications, MVVM Structure, etc.

🧠 Skills

Programming languages — <u>Android development</u> | Java | Kotlin | <u>iOS</u> | Swift | C++ | SQL | Git versioning | <u>React Native</u> | Java Script | Type Script

🌐 Languages

English | Hindi | Gujarati

🎓 Education

2014 – 2018	**B.E (C.E),** *Sanjaybhai Rajguru college*
	Pass-out CE with 7.04 CGPI.
2012 – 2014	**12th Sci,** *Samarth Science School*
	Pass-out 12th science with 52%

👥 Core Competencies

Good Learner | Most Innovative Technology | Teamwork/Collaboration | Strategy Planning | Team Leader | Responsible Decision-Making

📚 Courses

The Complete Java Developer Course, *Udemy* 🔗
This course provided a comprehensive introduction to Java programming, focusing on both foundational concepts and practical application development.

📁 Projects

PictionUs, *Photo sharing platform* 🔗
A collaborative photo-sharing app designed for wedding parties to create shared albums. Users join via link or QR code and easily upload photos and videos in real-time.

Tydlig, *Comprehensive School Management Solution (React Native)*

A React Native-based application designed for schools to efficiently manage teacher assignments, schedules, timetables, and leave requests, improving administrative workflows.

Escon Leads, *Builder & Broker Management App (React Native App)*

An app built using React Native for managing builder and broker data, with functionality to add, edit, and track site details efficiently.

Habito, *Daily Habit Tracker* 🔗

Smart Habit Tracker & Daily Goal Planner

Pocket Jury, *Legal Roleplay & Debate App (Android Native)* 🔗

A fast-paced legal simulation app built on Android Native, where users can play as plaintiffs, defendants, jury members, or spectators. Present your case in quick 2-minute arguments and get instant verdicts from a live jury, blending justice with entertainment anytime, anywhere.

Solo AI chat app, *An AI-based chat application*

An AI-powered chat application built using Android Native, offering both offline and online chat capabilities for seamless user interaction anytime.

Tuck, *Instant Cashback (Android App)* 🔗

Earn instant cashback by buying gift cards for your favorite stores, restaurants, groceries, hotels, and more. Save money every time you shop!

Other Projects, *Other Android Native Projects*

Surfair: Flight Management App

Ancient Origin 🔗 : The Ancient Origins App for Android puts history, archaeology, mystery, and science at your fingertips.

XIAO app Lottery: Lottery-related app

Picking Process Flipkart: Internal or warehouse app related to the item picking process for Flipkart logistics.

1Fichier.com: A file storage app built on Android Native, allowing users to save files securely and access them easily from anywhere.

NumberBook Lookup: A phonebook application built on Android Native that provides Arabic caller identification and a powerful search engine for finding contact information.

Bazaar, *Sales Management System*

Bazaar's tablet-based Sales Management System, also known as a Point of Sale (POS) system, offers comprehensive capabilities for managing product sales, transactions, and related activities.

This system is developed using Core Java and adopts the MVP (Model-View-Presenter) architectural pattern and contains dual screen and different hardware integration like a mifare reader, cash drawer, printer, and separate QR code scannner.

Bazaar HandPOS, *Handy POS system with printer*

Bazaar HandPOS utilizes Verifone, an electronic payment gateway renowned for its secure transaction processing solution.

Edudus, *Smart Pen Digital Note App (Android Native)* 🔗

A smart pen solution with a companion app that captures handwritten notes, sketches, and artwork digitally with precision, allowing users to store, retrieve, and share their work seamlessly across platforms.

InfoPlayer

The InfoPlayer TV and table-based app consistently shows advertisements.

Wiyak Rider and Automak Driver, *Taxi booking app, and other similar app*

Developed an application that simplifies the process of booking taxis for various services, including city rides, hourly rentals, and long-term outstations.

The app enables real-time driver tracking, along with coupons, ride scheduling, delivery service, booking history, Refer & Earn, receipts, and more.

Combine 12 or more similar applications into one project with Flavour, and also implement them on iOS using Target.

Diver app for managing booking.

Implement functionalities like the Endless service for bookings while an application is offline, real-time distance and speed calculations, and assist junior developers in implementing additional features.
